

Advanced Search and Rescue Skills Day

June 17, 2023
8 am to 5 pm

Join us for nine hours of hands-on training focusing solely on residential search. We will focus on the fastest and most efficient way to remove victims from a residence. Topics include Victim Location, Probability, Victim Drags, VES, Thermal Imaging, Oriented, and Split Search. The afternoon will cumulate in IDLH Search and VES scenarios.

This course is fast-paced, with a significant emphasis on increasing our base level of training by honing the basics in the most realistic environment we can create!

Students must pre-register in Acadis:
